Aditya Saligrama

(774) 270-7173 | aditya@saligrama.io | saligrama.io | linkedin.com/in/saligrama

Computer science major at Stanford University with experience in security, systems, and machine learning

Education

Stanford University Sep. 2020 – Jun. 2024

B.S. Candidate in Computer Science (Systems track) | *GPA 3.92* *Stanford, CA*

- Coursework: **CS 255** (Cryptography), **CS 229** (Machine Learning), **CS 224U** (Natural Language Understanding), **CS 161** (Algorithms), **CS 155** (Computer and Network Security), **CS 154** (Theory of CS), **CS 143** (Compilers), **CS 140E** (Embedded Operating Systems), **Math 104** (Applied Matrix Theory)

Experience

Incoming Software Engineering Intern Jun. 2022 – Sep. 2022

Lacework *San Jose, CA*

Research Assistant Apr. 2021 – Present

Stanford Open Virtual Assistant Lab (OVAL) | *Supervised by Monica Lam* *Stanford, CA*

- Work on virtual assistants to classify customer support requests with GPT-3 data augmentation

Competition Linux Lead Jan. 2021 – Present

Stanford Applied Cybersecurity *Stanford, CA*

- Responsible for securing Linux systems against external penetration testing team in competition environment
- Placed 1st in Western Regional CCDC qualifier and finals, 3rd in National CCDC

Research Assistant Jun. 2017 – Present

Harvard University | *Supervised by Margo Seltzer, Cynthia Rudin* *Cambridge, MA*

- Work on parallelizing CORELS, a machine learning algorithm that builds human-interpretable rule list models
- Co-first author of upcoming paper on systems optimizations that allow algorithm to scale to large datasets
- Implemented public web UI and R language API

Engineering Intern Nov. 2020 – Apr. 2021

Uptycs *Waltham, MA*

- Deployed production feature to `osquery` monitoring software to inspect and detect malware in Java packages
- Functionality helped detect and patch client software with Log4j vulnerabilities

Research Science Institute Intern Jun. 2019 – Aug. 2019

Akamai Labs *Cambridge, MA*

- Deployed realtime garbage collection monitoring system for Go language programs with per-thread detail

Research Assistant Jan. 2018 – Jun. 2020

MIT PRIMES *Cambridge, MA*

Project I: Rust Concurrency Analysis | *Supervised by Jon Gjengset, Frans Kaashoek* *Jan. 2018 – Apr. 2019*

- Developed set of fast, lock-free concurrent hashmaps for the Rust language with 100+ stars on GitHub
- Presented report on how the Rust language helps and hurts developers in writing concurrent code

Project II: Adversarial Machine Learning | *Supervised by Aleksander Madry* *Jan. 2019 – Jun. 2020*

- Developed ensemble schemes that improve accuracy while preserving adversarial robustness vs. single model
- Presented at ICLR 2020 workshop on trustworthy machine learning (44% acceptance rate)

Publications

A. Saligrama, G. Leclerc. Revisiting Ensembles in an Adversarial Context: Improving Natural Accuracy. *ICLR 2020 Workshop on Towards Trustworthy ML: Rethinking Security and Privacy for ML (ICLR:TML'20)*, 2020.

A. Saligrama. KnowBias: Detecting Political Polarity in Long Text Content. *AAAI 2020 Student Abstract and Poster Program (AAAI:SAP'20)*, 2020.

A. Saligrama. KnowBias: A Novel AI Method to Detect Polarity in Online Content. *arXiv:1905.00724*, 2019.

A. Saligrama, A. Shen, J. Gjengset. A Practical Analysis of Rust's Concurrency Story. *arXiv:1904.12210*, 2019.

N. Larus-Stone, E. Angelino, D. Alabi, M. Seltzer, V. Kaxiras, **A. Saligrama**, C. Rudin. Systems Optimizations for Learning Certifiably Optimal Rule Lists. *SysML Conference*, 2018.

Selected Awards and Honors

- 1st place team, Western Regional CCDC; 3rd place team, National CCDC (2022)
- 2nd place team, Western Regional CCDC; 2nd place team, National CCDC wild card round (2021)
- Congressional App Challenge Winner, Massachusetts 5th District (2018)
- USA Computing Olympiad, Gold Division (2018 – 2020)
